IDENTIFIERS Fairfax County; Virginia

ABSTRACT

Outlined is the 5-year plan (1973-78) for public school special education services (preschool through post high school) in Fairfax County, Virginia. Included are a brief statement of the school division's philosophy of special education and a summary of a survey of nine categories of handicapped children showing how many are or are not being served by various types of programs. Detailed report forms are included on the educable mentally retarded, trainable mentally retarded, hearing-impaired, visually impaired, emotionally disturbed, learning disabled, physically handicapped, speech handicapped, and multiply handicapped. Reports on each disability population include: a specific report (from the survey of handicapped children) on how many children are or are not being served in various types of programs at various age levels; program plans for each of 5 years which include specific problem areas (such as need for music therapy for the mildly retarded or insufficient itinerant therapist time to eliminate waiting lists) matched with objectives and activities; the number of instructional and paraprofessional personnel (current and projected) matched with the number of children served; and the number of current and projected programs, whether self-contained, resource, or itinerant, serving that handicap area on each educational level. Also included are brief discussions of special provisions for materials, transportation, cooperation with other school divisions or agencies, and plans for program evaluation. (LC)

Foreword

The *Five-Year Plan for Special Education Programs in Fairfax County Public Schools* was written in compliance with Section 22-9.1:03, *Code of Virginia*, and regulations of the State Board of Education, *Standards of Quality and Objectives for Public Schools in Virginia*, enacted 1972. It is an extrapolation of such documents as the *Blueprint for Action, the Special Education Study*, a cost analysis of the *Blueprint* and a planning report recommending facilities for programs for children with special needs, as well as the expertise of selected special education staff and consultants. This revised plan has been developed in consultation with the local special education advisory committee and is based on the original Five-Year Plan which was approved by the School Board on June 28, 1973.

The revised plan should not be viewed as final. It can and must be altered as more comprehensive incidence data is procured; as programing is extended beyond the present ages of 5-18, to include ages 2-5 and 18-21; as the full impact of longitudinal programs, preschool through high school, are evaluated; as intensive staff development is initiated and expanded; as priorities are reordered; as students, through improved assessment, resource assistance or more discrete planning, are more frequently involved in general education programs; and as other variables act upon present planning.

Implications for cost in this expanding program are many and complex. As we add preschool children, ages 2-5, and post-school students, ages 18-21, the Special Education Division, because of state legislation, will move from a total school population of approximately 137,000 students to a potential of 195,000 from which to draw students with handicapping conditions. The state and local commitment for children with handicapping conditions is not only to identify them, but to provide appropriate educational opportunities for them through local programs, regional cooperative programs, or tuition assistance when no public school program is available.

Appropriate educational opportunities in the Special Education Division in the past have been limited and highly selective. The goal of the Fairfax County Public Schools is to accept the responsibility for the development of each child into an adult who can stand confidently, participate fully, learn continually and contribute meaningfully in his world insofar as he is able. Insuring appropriate educational opportunities for all must include not only appropriate programs, but monies for personnel, equipment, materials, supplies, transportation, staff development, and facilities.

Foreword (cont.)

The philosophy of the Five-Year Plan is relatively simple. The service needed by a student to succeed at his potential should be provided. No child should receive more service than is necessary or appropriate. Services should be provided along a continuum. Some students may do very well based in regular classrooms, with periodic help from specialists, while other students may require help on a daily basis. Minimal special help may be sufficient for some; others cannot attend school without a completely altered program. The Five-Year Plan includes services at all levels along the continuum.

Special Education Division*

PERSONNEL INVOLVED IN THE STUDY

ORIGINAL FIVE-YEAR PLAN

Gary D. Snodgrass	Coordinator, Special Education Division
Margaret E. Faulk	Planning Specialist
Beatrice Foster	Area IV Coordinator of Special Education
Dorothy Haramis	Area III Coordinator of Special Education
Daniel Link	Specialist, Learning Disabilities
Robert Miley	Area II Coordinator of Special Education
Gene P. Moore	Operations Specialist
Pierce Wood	Area I Coordinator of Special Education
Victor Small, Ph.D.	Consultant for Study

PERSONNEL INVOLVED IN THE PREPARATION OF THE UPDATED FIVE-YEAR PLAN

Gary D. Snodgrass	Coordinator, Special Education Division
Patricia Bakaitis	Program Specialist--Physically Handicapped/Multiple-Handicapped
Emilie Boyd	Program Specialist--Learning Disabilities
Margaret E. Faulk	Planning Specialist
Sarah Lahr	Information Officer--Special Education
Daniel Link	Evaluation Specialist
Donald McGee	Program Specialist--Hearing
Jane Milnes	Program Specialist--Vision
Frank Moore	Educational Technologist
Gene P. Moore	Operations Specialist
Claudia Nelson	Program Specialist--Speech
Robert Pantall	Learning Disabilities Specialist, Area II
Betty Pubright	Program Specialist--Moderately Retarded
Martha R. Selph	Program Specialist--Emotionally Disturbed/Autistic/Mildly Retarded/ Vocational
Marilyn Semmes	Program Specialist--Preschool
Nancy Vorobey	Program Development Specialist--Central Auditory Abilities

Report Form: *Updated Five-Year Plan for Special Education Programs*

Number 2

DATE DUE:

February 15, 1974

Please return one copy of this form to:

Mr. James T. Micklem, Director
Division of Special Education
State Department of Education
Richmond, Virginia 23216

I submit herewith our *Five-Year Plan for Special Education Programs* in accordance with Section 22-9.1:03, *Code of Virginia*, Special Education Program Standard a. contained in the *Standards of Quality* and the regulations of the State Board of Education

This Plan has been developed in consultation with the local special education advisory committee and was approved by the School Board on February 14, 1974.
(Date)

Fairfax County
School Division

Division Superintendent

February 14, 1974
Date

Elements to be included in the Five-Year Plan are as follows:

1. Brief narrative statement of the school division's philosophy of special education, including the relationship to the philosophy of education for all children.
2. Brief statement of the role and function of the Special Education Advisory Committee.
3. Form: 5 Yr. SEP-1 reports the Summary of Survey of Handicapped Children.
4. Forms: 5 Yr. SEP-2 through 5 Yr. SEP-10 (sections a-d) reports in summary the priority problem areas, objectives, personnel, and models planned for each category of handicapped children during each of the five years.
5. Form: 5 Yr. SEP-11 reports the Summary of Administrative and Other Support Personnel needed to implement your division's objectives for each school year.
6. Form: 5 Yr. SEP-12 reports the Local Special Education Committees and Policies.
7. Brief narrative description of the provisions for special instructional materials and equipment essential for handicapped children.
8. Brief narrative description of provisions for special transportation of handicapped children, if this is necessary, or statement that special transportation is not required.
9. Brief narrative description of cooperative arrangements with other school divisions or agencies which provide services for handicapped children, or a statement that these are not necessary.
10. Brief narrative description of plans for evaluating the educational services provided handicapped children.

Instructions

- I. Identification of the school division is required on each form and narrative statement.
- II. Abbreviations used are for areas of exceptionality as defined in *Administrative Requirements and Guidelines for Special Education Programs*.

EMR--Educable mentally retarded (Mildly retarded)
 TMR--Trainable mentally retarded (Moderately retarded)
 HI--Hearing-impaired
 VI--Visually impaired
 ED--Emotionally disturbed
 LD--Learning-disabled
 PH--Physically handicapped
 SH--Speech-handicapped
 MH--Multiple-handicapped

III. Report Forms:

A. SEP-2 through SEP-10

1. Section a should indicate the number of handicapped children within the school division.
2. Section b:
 - a. Problem Areas--Describe briefly in child-centered terms major gaps and weaknesses in your special education program for this type of child. Indicate the number and ages of children affected by each problem. (List in order of priority.)
 - b. Objectives--By school years, describe briefly the major objectives which are expected to be achieved within each problem area.
 - c. Activities--By school year, list briefly the activities to meet each objective. Include a description of assignment of instructional personnel (self-contained special class, resource, itinerant, etc.)
3. Section c should indicate the current number of children served and the instructional and paraprofessional personnel employed. Further it should include the number of children to be served as well as instructional and paraprofessional personnel to be employed 1971-72.

4. Section 4 should report the current program and projected plans anticipated to implement services 1974-78.

The Self-Contained Model is a special class for one category of exceptional children. The major portion of the child's instructional program is provided within a small-group setting by a special teacher.*

The Resource Model is a program in which the special teacher* provides educational instruction in a specialized setting for children of one identified area of exceptionality. The amount of time spent in the special setting depends upon the needs of the child.

The Itinerant Model is a program in which the special teacher* provides educational instruction for a specific category of exceptional children who are maintained in the regular classroom. Service may be provided by this teacher to more than one school.

B. SEP-12 should include the local Special Education Advisory Committee members, position, and term; the name of the chairman of the local placement committee; and the School Board special education policy.

IV. Please note that the statistical data for the current year (1973-74) should be in agreement on all forms.

V. Brevity and clarity are encouraged. If program needs and objectives remain constant for more than one year, refer to Number 1 on page 2 under elements to be included in the Five-Year Plan. There is no need for repetition.

VI. Return the original form and 1 copy to the Division of Special Education, State Department of Education.

VII. Plans are to project the full implementation of educational services for all handicapped children by the school year 1976-77 in accordance with State Board of Education regulations.

* The special education teacher, or speech pathologist, should meet state certification requirements for specific endorsement in the particular area of exceptionality for which employed.

FAIRFAX COUNTY PUBLIC SCHOOLS

SPECIAL EDUCATION DIVISION, DEPARTMENT OF INSTRUCTIONAL SERVICES

PHILOSOPHY

It is the intent of the Fairfax County Public Schools to:

- Accept the responsibility for the development of each exceptional child into an adult who can stand confidently, participate to his maximum potential, learn continually, and contribute meaningfully in his world as incorporated with the Fairfax County Public Schools philosophy of education for all children.
- Develop a comprehensive system of planning, programing, budgeting and evaluating for exceptional students, to insure quality programs of education.
- Initiate competency-based evaluations of personnel serving this population of exceptional students. These evaluations will determine the nature and extent of inservice training necessary to maintain a quality of service which insures that each child will reach his maximum potential.
- Construct a continuum of services offering each exceptional student educational alternatives necessary to meet his unique needs. Public school resources will be supplemented by the judicious use of tuition grants to enable students needing additional resources to attend state-approved private schools.
- Determine each student's eligibility, placement and continuance in a given program in accordance with the *Administrative Requirements and Guidelines for Special Education Programs*.
- Provide by September 1, 1977, through an orderly progression, appropriate educational services for all exceptional students in the Fairfax County Public Schools.

Report Form:

a. Problem Areas	b. Objectives	c. Activities
<p><u>1973-74</u></p> <ol style="list-style-type: none"> 1. Limited integration and maintenance of mildly retarded students capable of functioning in certain regular classroom activities. 2. Lack of sufficient staff to assure adequate follow-up and employer/school coordination for students in the present work-study program. 3. Need for review of the present instructional programs for the mildly retarded secondary students. 	<ol style="list-style-type: none"> 1. To provide support to the integrated student and regular classroom teacher through the services of a resource teacher. 2. To provide follow-up and employer/school coordination for students employed through the work-study program. 3. To organize a program review committee to study, revise and develop a functional work-study program for secondary schools. 	<ol style="list-style-type: none"> 1. Add 6 resource teachers to the staffs of the centers for mildly retarded, not to be included in the pupil/teacher ratio of the school, to assist mildly retarded students, regular students, and the classroom teachers to participate in the regular classroom program. 2. Provide 4 full-time work-study coordinators in the placements, follow-ups, and job/program coordination within the school setting and with employers and service agencies working with this school population. 3. Direct the planning specialist in the Division of Special Education to coordinate the activities of a program review committee in studying, revising and developing an instructional program for mildly retarded students at the secondary level.

a. Problem Areas	b. Objectives	c. Activities
<p>1274-75</p> <ol style="list-style-type: none"> 1. Need for additional programs modeled on the Reston Special Pre-School for Children with Developmental Difficulties. 2. Isolation of teacher and classroom where there is only one special education class in a school. 3. Limited support for mildly retarded students integrated into regular classes, as a result of insufficient direct assistance to teachers involved. 4. Need for brochures and slide-tape presentations which clearly and concisely describe the mildly retarded program. 	<ol style="list-style-type: none"> 1. To develop additional preschool programs based on the Reston model. 2. To form clusters of no less than 2 nor more than 3 mildly retarded classrooms to a school setting. 3. To increase the amount of services offered to mildly retarded students in regular classes and to those teachers working with these students. 4. To inform parents and the community of the services which are available to mildly retarded students. 	<ol style="list-style-type: none"> 1. Develop and implement 3 classes based on the Reston model and fully fund the Reston preschool. 2. Select elementary schools to house clusters of mildly retarded classrooms, based on acceptance and interest of principal, suitable space and geographic location. 3. Assign resource teachers to schools where there are mildly retarded students in the mainstream, for the purpose of assisting regular teacher in programming for these students. Assign resource teachers to clusters of classrooms for mildly retarded to aid the special education teacher in placement and maintenance of students in the mainstream, and to assist the receiving teacher in programming for these children. 4. Produce brochures and slide-tape presentations which make the community aware of available services for mildly retarded students in Fairfax County Public Schools and counteract refusal of referral to, or placement in, mildly retarded programs by school staff or parents.

(cont.)

(cont.)

(cont.)

a. Problem Areas	b. Objectives	c. Activities
1974-75 (cont.)		
5. Need to assure employer/school coordination and follow-up for students in the work-study program.	5. To provide a vocational component to assure employer/school coordination and follow-up for work-study students.	4. Publish and distribute program reports and information to the community.
6. Need for a longitudinal curriculum of instruction to provide more viable experiences for special education students.	6. To initiate the development of a longitudinal curriculum to provide teachers with a guide from which they could identify the academic, psychosocial, and vocational skills required at each level, preschool through postgraduate, to accomplish the long-range objective of successful job placement.	5. Assign 4 vocational specialists, 1 for each administrative area, to direct the work-study component of the program.
7. Need for adaptive physical education and motor training for mildly retarded students.	7. To provide a limited adaptive physical education and motor training program for the mildly retarded.	6. Form a program curriculum committee to include: the program specialist, chairman; 4 vocational specialists; and 4 teachers. This committee will research the literature on mildly retarded programs, preschool through post-high school, and observe programs in operation in other parts of the country.
8. Need for a scheduled program of inservice for the instructional staff of mildly retarded students.	8. To insure inservice programs on a regular schedule designed to involve the instructional staff in the development of a vocationally oriented curriculum.	7. Schedule consultative time for the adaptive physical education teachers to work with teachers of mildly retarded students and for the regular physical education teachers who teach mildly retarded students.
(cont.)	(cont.)	8. Request that regularly scheduled inservice days be included in the Fairfax County school calendar. The total staff for the mildly retarded will participate in the development of the curriculum through inservice meetings.

Program Plan-- MILDLY RETARDED (EMR)

a. Problem Areas	b. Objectives	c. Activities
<p><u>1974-75</u> (cont.)</p> <p>9. Need to increase competencies of personnel in the program for mildly retarded.</p> <p>10. Need for music therapy in the program for mildly retarded.</p> <p>11. Need for reevaluation of student placement in the mildly retarded program.</p> <p>12. Need to provide systematic program of training in auditory perceptual skills.</p>	<p>9. To provide ongoing educational opportunities as appropriate to need.</p> <p>10. To provide for music therapy in the program for mildly retarded in Fairfax County Public Schools.</p> <p>11. To ascertain the most recent date of psychological testing on each student in the mildly retarded program.</p> <p>12. To develop central auditory abilities in students through a systematic, sequential program.</p>	<p>9. Request the Office of Staff Development and Training to continue to make available, through local universities, courses of instruction to insure competency-based teacher education for the staff of the program for mildly retarded.</p> <p>10. Research available programs of music therapy for study.</p> <p>11. Search the computer for psychological test dates on each student in the mildly retarded program and provide for systematic follow-up procedures.</p> <p>12. Provide teachers with a systematic, sequential program designed to develop the central auditory abilities of students, training in program use, and supporting consultative services as indicated.</p>

a. Problem Areas	b. Objectives	c. Activities
1975-76		
1. Need for increased services to mildly retarded preschool children.	1. To develop additional preschool program.	1. Develop and implement additional preschool class.
2. Need for extended resource support.	2. To provide resource support in each elementary and secondary cluster.	2. Assign 1 resource teacher to each elementary cluster, and 2 resource teachers to each secondary cluster (or 1 intermediate and 1 high school).
3. Limited service in adaptive physical education and motor training.	3. To provide instruction in adaptive physical education in each administrative area.	3. Employ 4 full-time adaptive physical education teachers to coordinate the physical education program and conduct workshops in gross motor training for the instructional staff.
4. Need for increased community education and involvement in the program for the mildly retarded.	4. To distribute brochures and present slide-tape shows in the community.	4. Distribute brochures to offices of pediatricians, clinics, health departments, schools, organizations, etc. Schedule slide-tape presentations for PTA meetings, association meetings, parent groups, regular school staffs, day care centers, social services, etc.
5. Need for a curriculum guide for the mildly retarded program in Fairfax County, ages 2-21.	5. To finalize a draft of the longitudinal curriculum for the mildly retarded program, and begin implementation at all levels.	5. Complete a draft of the program model for mildly retarded program and initiate implementation.
6. Need for staff development programs.	6. To provide inservice to develop competencies in implementing the longitudinal vocational curriculum.	6. Vocational specialists assist classroom teachers in implementing the vocational curriculum at all levels
7. Need to plan for anticipated program growth in mildly retarded student population.	7. To provide classes and resource support for all identified mildly retarded students.	7. Provide instructional staff to meet objectives.

a. Problem Areas	b. Objectives	c. Activities
<p>1975-77</p> <p>1. Need for more extensive parent programming and parent involvement in preschool.</p> <p>2. Need for a curriculum in adaptive physical education.</p> <p>3. Need for a curriculum guide for the mildly retarded program in Fairfax County.</p> <p>4. Need for programs for staff development.</p> <p>5. Need to plan for anticipated program growth in mildly retarded student population.</p>	<p>1. To provide more extensive parent programming and increase parent involvement in the program for pre-school children.</p> <p>2. To initiate the development of an adaptive physical education program guide for the mildly retarded program.</p> <p>3. To refine the intermediate and high school component of the curriculum sequence; implement fully.</p> <p>4. To insure uniformity in the general philosophy goals and curriculum of the program for mildly retarded students in the 4 administrative areas in Fairfax County.</p> <p>5. To provide classes and resource support for all identified mildly retarded students.</p>	<p>1. Provide consultants and inservice training to the preschool staff to enable them to facilitate more systematic parent programming and increase parent involvement in the preschool.</p> <p>2. Form a committee consisting of the vocational specialists and teachers for the mildly retarded from each level to refine the intermediate and high school component of the curriculum guide in light of experience gained from implementation.</p> <p>3. Form a committee consisting of the adaptive physical education teachers and classroom teachers to develop a physical education curriculum guide.</p> <p>4. Provide consultants and workshops in curriculum development and implementation</p> <p>5. Provide instructional staff to meet objectives.</p>

Problem Areas	Comparison	Recommendations
1377-78		
1. Need to be certain all preschool mildly retarded children are being served.	1. To determine whether all preschool mildly retarded children are being served and plan to provide service where needed.	1. Review current available information in order to identify preschool children not presently being served and plan ways of implementing service to this population.
2. Need to reflect growth and change in informative literature.	2. To update the literature on the mildly retarded program.	2. Revise literature where needed; add to existing audiovisual presentations. Expand audience.
3. Need for a curriculum sequence in adaptive physical education.	3. To complete a draft of an adaptive physical education curriculum guide.	3. Direct the adaptive physical education committee to submit a rough draft of an adaptive physical education curriculum for study.
4. Need for a complete curriculum guide for the mildly retarded program.	4. To refine the elementary component of the curriculum guide.	4. Form a committee consisting of the vocational specialists and teachers of the mildly retarded from each level to refine the primary and elementary component of the curriculum guide in light of experience gained from implementation.
5. Need for inservice program for staff development.	5. To provide inservice to develop competencies in evaluating the longitudinal program.	5. Provide in-house consultants to assist in the evaluation of the Fairfax County curriculum guide for the mildly retarded program and its implementation in the classrooms.
6. Need for a student placement and counseling service, postgraduate.	6. To provide an employment-placement center for graduates, 16-21 years of age.	6. Design a work-study student placement and counseling service which would provide the student with information on further specialized training centers, placement in postgraduate training programs, (cont.)

a. Problem Areas	b. Objectives	c. Activities
<p><u>1973-74</u></p> <ol style="list-style-type: none">1. Inadequate oral communication skills presently exhibited by moderately retarded students.2. Limited occupational training program for older moderately retarded students.3. Need to determine the most appropriate physical configuration for the program for the moderately retarded.	<ol style="list-style-type: none">1. To provide full-time services to those students identified as having communication problems in production and language.2. To increase the opportunities for occupational training and sheltered job employment for these students.3. To develop criteria for the selection of physical facilities necessary to house the moderately retarded program.	<ol style="list-style-type: none">1. A full-time oral communications specialist, assigned to the Holmes Center, instruct students with communication problems.2. Make available the full-time services of a specialist responsible for training and placing the moderately retarded in sheltered job positions in the community.3. A committee composed of school personnel, parents, and consultants identify criteria for the selection of physical facilities necessary to house programs for the moderately retarded.

A. Problem Areas	B. Objectives	C. Activities
<p>1. Absence of vocational component for moderately retarded students.</p>	<p>1. To develop vocational component for moderately retarded students, ages 16-21.</p>	<p>1. Provide vocational position and equipment to develop a vocational training component of the moderately retarded program. Identify skills for younger students which lead into vocational training.</p>
<p>2. Need for curriculum guides in the areas of safety, self-care, mathematics, and basic knowledge skills.</p>	<p>2. To develop curriculum guides in the areas of safety, self-care, mathematics, and basic knowledge skills.</p>	<p>2. Conduct curriculum workshop during the school year to write curriculum guides for use in the areas of safety, self-care, mathematics, and basic knowledge skills.</p>
<p>3. Need to identify preschool moderately retarded students.</p>	<p>3. To identify preschool moderately retarded students in the community.</p>	<p>3. Conduct survey of moderately retarded children, birth to age 5. Complete diagnostic workup on all who will be 3 years old by 1975.</p>
<p>4. Need to develop better understanding of moderately retarded program within the community.</p>	<p>4. To promote better understanding of the program for moderately retarded in the community.</p>	<p>4. Prepare brochures on program for moderately retarded. Involve parents in developing curriculum guide (Objective 2) in order to foster a better understanding of the program.</p>

1974-75

a. Problem Areas	b. Objectives	c. Activities
<p>1975-76</p>		
<p>1. Need for psychomotor training for moderately retarded students.</p>	<p>1. To implement a regularly scheduled program in adaptive physical education and psychomotor training.</p>	<p>1. Provide full-time adaptive physical education/physical therapy teachers.</p>
<p>2. Absence of occupational therapy in schools for the moderately retarded.</p>	<p>2. To insure that students needing occupational therapy receive assistance from licensed occupational therapist.</p>	<p>2. Provide part-time occupational therapist for moderately retarded students.</p>
<p>3. Absence of a preschool program for moderately retarded children.</p>	<p>3. To initiate a program for 3- and 4-year-old preschool children.</p>	<p>3. Add equipment and staffing needed at each center for the moderately retarded to implement a preschool program for children, ages 3 and 4. Provide consultative service to parents of 2-year-old moderately retarded children.</p>
<p>4. Need for constant review and revision of the curriculum guide for moderately retarded.</p>	<p>4. To revise the curriculum guide in the areas of safety, self-care, mathematics, and basic knowledge skills.</p>	<p>4. Conduct workshop for teachers, parents, and administrators to revise new portion of the curriculum for moderately retarded.</p>
<p>5. Need to include post-high school students in vocational component.</p>	<p>5. To provide selected post-high school students with vocational skills in the area of laundry operations.</p>	<p>5. Provide training program and part-time employment for post-high school students in school laundry operations.</p>

a. Problem Areas	b. Objectives	c. Activities
<p><u>1976-77</u></p> <ol style="list-style-type: none"> 1. Need to expand program to include all moderately retarded students, ages 2-21. 2. Lack of qualified teachers for pre-school moderately retarded classes. 3. Lack of space to provide for identified students in moderately retarded program. 	<ol style="list-style-type: none"> 1. To provide facilities and staff to implement full service to all moderately retarded, ages 2-21. 2. To assure fully trained staff in all classes for moderately retarded. 3. To provide expanded facilities to meet program needs. 	<ol style="list-style-type: none"> 1. Expand preschool program from pre-sent consultative services for parents of 2-year-old moderately retarded children to provide formal, small-group instruction directly to the child. 2. Initiate a series of inservice programs designed to strengthen the competencies of teachers working with preschool moderately retarded children. 3. In cooperation with Support Services Division, determine the plans and requirements necessary for the establishment of a center for moderately retarded students.

d. Problem Areas	b. Objectives	c. Activities
<p>1977-78</p> <p>Need for continual staff development to insure individualization of program.</p>	<p>To provide a comprehensive inservice training program for teachers of moderately retarded.</p>	<p>Develop a comprehensive inservice training program for teachers and aides. Provide substitute teachers for those teachers attending inservice programs.</p>

1. Problem Areas	2. Objectives	3. Activities
1973-74		
1. Insufficient classroom positions for the number of preschool children needing service.	1. To increase the amount of services offered to children ages 2-5.	1. Add a full-time preschool teacher for children ages 2 and over.
2. Insufficient classroom positions for the number of children requiring total communication placement.	2. To increase the amount of services offered to total communication children ages 7-13.	2. Increase the number of teaching positions in the total communication program from 1 to 3 to include children up to age 13.
3. Insufficient itinerant therapist time to eliminate waiting lists.	3. To increase services in order to serve waiting-list children.	3. Add 1 itinerant therapist position for full-time therapy.
4. Bus rides too long for some children in the classroom programs.	4. To identify methods by which bus service could be improved.	4. Survey parents to determine amount of time spent on bus by each child. Coordinate with Transportation Division to plan reductions for children who have lengthy bus rides.
5. Approximately 15% of classroom population identified as having learning problems in addition to hearing impairment.	5. To select children with learning problems and provide alternative programming.	5. Add 1 full-time teaching position for a teacher dually trained in learning disabilities and education of the hearing-impaired.
6. Parent concerns about various aspects of the hearing program.	6. To establish more direct channels of communication between parents and administration.	6. Establish a liaison committee for regular meetings between central administration and representative parent group.

a. Problem Areas	b. Objectives	c. Activities
<p>1974-75</p> <ol style="list-style-type: none"> 1. Need to provide diagnostic services to schools which refer children with known or suspected hearing loss. 2. Many children who live too far from classroom centers. Improved bus service will not decrease length of bus ride sufficiently because of distances involved. 3. Indication of need for total communication classroom for children below the age of 7. 4. Absence of intermediate school classes for children requiring total communication. 5. Insufficient integration of hearing-impaired self-contained children into regular classes. 6. Few children identified age 2 and younger. 	<ol style="list-style-type: none"> 1. To extend itinerant program so that every school which refers children for evaluation may be served. 2. To identify one or more centers which would more effectively serve the needs of children with long bus rides. 3. To identify specific children below age 7 who require service in the total communication program. 4. To identify and provide service to total communication children of secondary ages. 5. To provide mainstream experiences for every child according to his degree of readiness. 6. To set up an identification program 	<ol style="list-style-type: none"> 1. Add itinerant diagnosticians to follow up referrals from school principals and identify level of need for each child referred. 2. Establish a minimum of 3 classroom centers based on proximity to children served, as well as on potential for delivery of high-quality services. 3. Add a teaching position for total communication preschool class. 4. Add a position for intermediate total communication class. 5. See Objective 2 and Activity 2. Add itinerant positions to provide therapy and facilitate integration of hearing-impaired children into regular classes according to need. 6. Add positions for home-school preschool component to identify and serve younger hearing-impaired children.

a. Problem Areas	b. Objectives	c. Activities
<p>1975-76</p>		
<p>1. Insufficient teaching positions to meet anticipated population growth at all levels of existing program.</p>	<p>1. To increase staff to meet expected numbers needing service.</p>	<p>1. Add teaching positions to meet increased population growth at pre-school, elementary and secondary levels.</p>
<p>2. Absence of a sufficiently differentiated program at preschool and elementary levels.</p>	<p>2. To provide differentiated programing for children who demonstrate needs beyond existing offerings.</p>	<p>2. Add preschool and elementary positions to provide classroom programs using natural language teaching, structured language teaching; for retarded hearing-impaired children and for learning-disabled hearing-impaired children.</p>
<p>3. Insufficient degree of instructional supervision for number of existing classrooms.</p>	<p>3. To provide more classroom supervision.</p>	<p>3. Provide 1 elementary position for head teacher to devote full time to instructional resource needs (classroom supervision) and 1 post-secondary position to coordinate high school programs and supervise career education curriculum. Provide 1 post-secondary position for children ages 18-21.</p>
<p>4. Lack of resource and self-contained classrooms at intermediate and high school levels.</p>	<p>4. To provide secondary-age students with alternative opportunities based on need.</p>	<p>4. Add positions for both oral and total communication classrooms and resource rooms at intermediate and high school levels. See also Activity 3.</p>
<p>5. Lack of sufficient integration capability for preschool children.</p>	<p>5. To provide full integration for all preschool children who are ready for peer group interaction with normally hearing children.</p>	<p>5. Add preschool positions to permit matching of hearing-impaired children with normally hearing preschoolers in integrated settings.</p>
<p>6. Absence of behaviorally oriented reporting to parents of hearing-impaired children.</p>	<p>6. To establish reporting procedures based on a behavioral curriculum.</p>	<p>6. Complete curriculum implementation project and design reporting instruments.</p>

a. Problem Areas	b. Objectives	c. Activities
<p>1976-77</p> <ol style="list-style-type: none"> 1. Need to serve all hearing-impaired infants and preschoolers identified through home-school survey and programming. 2. Need for alternative mainstreaming capabilities. 3. Insufficiency of program offerings at secondary level, especially for total communication children. 4. Need to expand services to meet anticipated growth at upper levels of program. 	<ol style="list-style-type: none"> 1. To establish sufficient capability to maintain continuing community survey program as well as teach the children identified. 2. To increase the amount of integration for each child who is not fully integrated with normally hearing children, including total communication children. 3. To increase types of offerings at secondary-age levels. 4. To provide necessary positions for upper elementary and secondary children. 	<ol style="list-style-type: none"> 1. Add positions for full implementation of service to hearing-impaired children ages 0-5, including a self-maintaining survey and reporting procedure which coordinates information from community resources on identification of hearing-impaired infants. 2. Add itinerant hearing positions to allow maximum integration of hearing-impaired children in their home schools with adequate therapy provided. 3. Add positions at the secondary level to provide for self-contained and resource programs for retarded, learning-disabled and other types of programs for profoundly deaf children. 4. Add an upper elementary or intermediate position for expected population growth.

a. Problem Areas	b. Objectives	c. Activities
<p>1977-78</p> <ol style="list-style-type: none">1. Need to evaluate progress and level of services.2. Need for research information on public school programs for hearing-impaired children.	<ol style="list-style-type: none">1. To conduct program-wide evaluation at the institutional level.2. To collate pertinent data on all individual children and evaluate.	<ol style="list-style-type: none">1. Through in-house and consultant services, evaluate program for hearing-impaired children to determine completeness of services offered.2. Through computer capability, examine data on children served during past 5 years to determine trends and needs of the program.

Program Plan--VISUALLY IMPAIRED

a. Problem Areas	b. Objectives	c. Activities
<p><u>1973-74</u></p> <ol style="list-style-type: none"> 1. Incomplete orders of braille and large-print books as supplied by the Virginia Commission for the Visually Handicapped as of September 1. 2. Lack of a central facility for the reception, dissemination, return and storage of materials belonging to Fairfax County Public Schools, the Virginia Commission for the Visually Handicapped, and other agencies. 3. Absence of a volunteer parent group to manage the reception, dissemination, return, and storage of materials belonging to Fairfax County Public Schools, the Virginia Commission for the Visually Handicapped and other agencies. 4. Absence of a preschool program for visually impaired children, ages 2-4. 	<ol style="list-style-type: none"> 1. To provide each visually impaired student with ordered books in the appropriate reading medium by September 1. 2. To provide a central facility for reception, dissemination, return and storage of materials for the vision program. 3. To engage a volunteer parent group to manage the central facility for the vision program. 4. To plan for a preschool program for visually impaired children, ages 2-4, that will be implemented during the 1974-75 school year. 	<ol style="list-style-type: none"> 1. Establish an agreement with the Virginia Commission for the Visually Handicapped whereby the Commission must notify Fairfax County Public Schools by July 1 of the books they can supply by September 1. For those NOT furnished by the Commission, Fairfax County Public Schools is responsible for their procurement. 2. Provide space at one of the four special education media centers where materials for the vision program may be received, disseminated, returned and stored. 3. Engage a volunteer parent group to manage the reception, dissemination, return and storage of materials belonging to Fairfax County Public Schools, the Virginia Commission for the Visually Handicapped, and other agencies. 4. Develop plans for a preschool program that will offer homebound vision program service to visually impaired 2-year-olds and their parents, and self-contained vision program service to visually impaired 3- and 4-year-olds and their parents. Employ 1 teacher for preschool vision program for 1974-75.
(cont.)	(cont.)	(cont.)

a. Problem Areas	b. Objectives	c. Activities
<u>1973-74</u> (cont.)		
<p>5. Lack of inservice days for regular classroom teachers who have visually impaired students in their classes.</p> <p>6. Lack of an aide for the preschool program.</p>	<p>5. To plan for inservice days for regular classroom teachers who have visually impaired students in their classes with emphasis on characteristics of visually impaired students, roles of itinerant vision personnel, materials for visually impaired students and subject area workshops.</p> <p>6. To provide an aide for the preschool self-contained program.</p>	<p>5. Plan inservice days for regular classroom teachers who have visually impaired students in their classes to be implemented in the fall 1974 and January 1975. Provide substitute teachers for those teachers attending the inservice days.</p> <p>6. Make budgetary provisions to employ an aide for the self-contained preschool vision program.</p>

a. Problem Areas	b. Objectives	c. Activities
<p><u>1974-75</u></p> <ol style="list-style-type: none"> 1. Lack of extended vision screening procedures. 2. Absence of a summer program for visually impaired students. 3. Absence of consultative and support services from a local ophthalmologist. 4. Lack of low-vision aids service to visually impaired students. 5. Lack of local university courses in the area of visual impairment. <p>(cont.)</p>	<ol style="list-style-type: none"> 1. To establish extended vision screening procedures which will identify children with vision problems in elementary schools in administrative Areas I and II. 2. To provide a summer program for visually impaired students of regular school age. 3. To provide ophthalmological consultation and support to the vision program. 4. To provide visually impaired students with low-vision aids prescription and utilization knowledge through the vision program consulting ophthalmologist. 5. To provide vision program personnel, parents, and others with courses related to visual impairment. <p>(cont.)</p>	<ol style="list-style-type: none"> 1. Involve community Lions Clubs, parent groups, and vision program personnel in the purchase of vision screening equipment and administration of vision screening procedures in elementary schools in administrative Areas I and II. 2. Implement a summer program for school-age visually impaired students and provide continuous reinforcement of skills development, mobility training, and personal management. 3. Make budgetary provisions to contract a local ophthalmologist who will act as a consultant to the vision program beginning 1975-76. 4. Establish plans with the consulting ophthalmologist to provide low-vision aids prescriptions and utilization knowledge for visually impaired students. 5. Establish plans with Fairfax County Public Schools Office of Staff Development and Training to encourage local universities to offer specific courses related to visual impairment. <p>(cont.)</p>

a. Problem Areas	b. Objectives	c. Activities
<p>1. Limited programs offered for students at the elementary level.</p>	<p>1. To provide additional staff to reduce the number of students at the elementary level waiting for service for learning-disabled.</p>	<p>1. Employ additional staff to insure that more students identified as having learning disabilities at the elementary level will be able to develop proficiency in basic academic skills commensurate with their capabilities and needs.</p>
<p>2. Limited programs offered for identified students moving from the elementary classes for learning-disabled to the intermediate school level.</p>	<p>2. To provide additional staff to expand the resource program for the learning-disabled at the intermediate school level.</p>	<p>2. Employ additional staff to continue the teaching strategies and use of specialized materials needed by the learning-disabled students in order to be successful learners at the intermediate level.</p>
<p>3. Absence of a planned inservice program for the instructional staff of the learning-disabled students.</p>	<p>3. To provide inservice programs to enhance and develop the instructional-based competence of the teaching staff.</p>	<p>3. Implement a cooperative arrangement with a university to promote a competency-based teacher education program.</p>
<p>4. Need for a systematic program plan and needs assessment for the secondary program in learning disabilities.</p>	<p>4. To provide a systematic program plan and needs assessment for a learning disabilities program at the intermediate and high school level.</p>	<p>4. Employ an individual to provide a program plan and conduct an assessment need for learning-disabled children in the intermediate schools and high schools.</p>

a. Problem Areas	b. Objectives	c. Activities
<p>1974-75</p> <ol style="list-style-type: none"> 1. Need for additional classes at the elementary school level. 2. Need for additional classes at the intermediate and high school levels. 3. Need for quality personnel certified by the state of Virginia to teach children with learning disabilities. 4. Need for systematic admission, review and dismissal procedures. 5. Need for a more specialized physical education program for children with motor difficulties. 6. Need for clusters of classes in schools selected to house classes for children with learning disabilities. 	<ol style="list-style-type: none"> 1. To provide additional staff which will reduce the numbers of students waiting for placement or on tuition grants. 2. To provide additional staff to expand the program for learning-disabled students at the intermediate and secondary levels. 3. To provide additional training to teachers of learning-disabled children which will improve the instructional program and lead to certification. 4. To provide a systematic admission, review, and dismissal procedure for placement of children within learning disability classes. 5. To provide a program in specialized physical education techniques for children with motor difficulties. 6. To provide clusters of classes in schools housing classes for learning-disabled children which will provide for flexible placement programming and preparation for return to the mainstream. 	<ol style="list-style-type: none"> 1. Employ additional staff to insure that those students identified as learning-disabled at the elementary level will be able to develop proficiency in basic academic skills commensurate with their capabilities and needs. 2. Employ additional staff at the intermediate and high school level to continue the instructional program for children entering from elementary school special classes. 3. Implement an extension of the Summer Learning Disabilities Institute to include a year-round staff improvement program for teachers of learning-disabled children. 4. Establish policies and regulations which will provide for unified admission and dismissal procedures in placing learning-disabled children. 5. Employ physical education teachers to provide a specialized adaptive physical education program for children in need of motor skill development. 6. Redistribute allocated positions in an attempt to offer more instructional options for the child

a. Problem Areas	b. Objectives	c. Activities
<p><u>1975-76</u></p> <ol style="list-style-type: none"> 1. Need for additional resource and self-contained classes for learning-disabled children. 2. Continued need for quality personnel certified to teach children with learning disabilities in the intermediate and secondary schools. 3. Need to provide adequate inservice and staff development activities for all personnel. 	<ol style="list-style-type: none"> 1. To provide additional resource and self-contained classes for those identified as learning-disabled and waiting for placement and to provide additional staff at the intermediate and secondary levels to continue services to those children moving from elementary to intermediate and secondary levels. 2. To provide a continued emphasis on improving the quality of learning disability teachers which also leads to state certification. 3. To provide inservice and staff development activities for all personnel working with learning-disabled children. 	<ol style="list-style-type: none"> 1. Employ additional staff to insure that previously identified children having learning disabilities develop proficiency in basic academic skills commensurate with their abilities and needs, both at the elementary and secondary levels. 2. Place more emphasis within the year-round training program for educational personnel in learning disabilities at the intermediate and secondary level. 3. Implement a schedule of ongoing inservice activities which strengthen staff competencies.

a. Problem Areas	L. Objectives	C. Activities
<p><u>1976-77</u></p>		
<p>1. Continued limitation of resource and self-contained classes at the elementary, intermediate, and secondary levels.</p>	<p>1. To provide resource and self-contained classes at the elementary, intermediate, and secondary levels for children waiting for placement.</p>	<p>1. Employ additional staff for resource and self-contained classes to provide for those children on waiting lists or tuition assistance at the elementary and secondary levels.</p>
<p>2. Continued need for staff development activities.</p>	<p>2. To provide appropriate staff development activities to strengthen staff competencies and improve instructional programs for teachers working with learning-disabled children at all levels.</p>	<p>2. Provide a continuing staff development program of in-services and workshops for all learning disability teachers.</p>
<p>3. Need for additional administrative and supervisory support.</p>	<p>3. To provide adequate supervision of instructional programs, diagnostic decisions and program planning for teachers of learning-disabled children at all levels.</p>	<p>3. Employ additional supervisory personnel to meet the expanded needs of the learning disabilities program.</p>
<p>4. Continued need for qualified certified educational personnel.</p>	<p>4. To provide further emphasis on training of staff working directly with learning-disabled children and increasing training opportunities for regular classroom teachers working with learning-disabled children.</p>	<p>4. Place a greater emphasis within the year-round training center on providing in-depth staff development for regular class teachers.</p>

a. Problem Areas	b. Objectives	c. Activities
<u>1977-78</u>		
1. Limitation of resource and self-contained classes at the elementary, intermediate, and secondary levels.	1. To provide enough resource and self-contained classes at the elementary, intermediate, and secondary levels to care for the needs of all identified learning-disabled children.	1. Employ additional staff to provide for the needs of all identified learning-disabled children.
2. Continued need for staff development programs.	2. To provide staff development activities for newly hired personnel and improvement of instructional programs in the area of learning disabilities at all levels.	2. Provide appropriate staff development activities for all learning disability teachers.
3. Continued need for additional administrative and supervisory support.	3. To provide adequate supervision as required by the revised state guidelines.	3. Employ additional supervisory personnel as per the revised state guidelines.
4. Continued need for qualified, certified educational personnel.	4. To continue further emphasis on staff training and increased communication on a regular basis regarding this training.	4. Increase emphasis on the year-round center to provide staff development for regular class teachers and to increase possibilities for regular expansion.

a. Problem Areas	b. Objectives	c. Activities
<p>12/5-74</p> <ol style="list-style-type: none"> 1. Absence of peer-group association for secondary-age students at Belle Willard School for the physically handicapped. 2. Lack of adequate number of instructional staff to fully implement the instructional program for physically handicapped students. 3. Inadequate transportation services provided for physically handicapped students. 4. Lack of space in present facilities for physically handicapped students. 	<ol style="list-style-type: none"> 1. To provide a secondary program in a high school facility in order to accomplish peer-group associations; to provide a continuum of academic services. 2. To reduce the pupil-teacher ratio to insure adequate programming as well as to meet the Virginia State Department of Education guidelines. 3. To reduce the length of travel time for physically handicapped students to and from school. 4. To expand the instructional space for physically handicapped students to insure an adequate learning environment. 	<ol style="list-style-type: none"> 1. Establish a secondary center for physically handicapped students at Fairfax High School to permit the physically handicapped the opportunity of a greater academic program as well as adequate peer-group associations. 2. Increase the instructional staff to meet the needs of physically handicapped students and the requirements of Virginia State Department of Education. 3. Provide 2 hydraulic lift buses and 3 half buses to reduce the time a handicapped student must spend on the bus and to provide for increasing population needs. 4. Increase the number of classrooms at Belle Willard, Fairfax High School, and Bush Hill Annex to facilitate the growth in enrollment and the increase in personnel.

a. Problem Areas	b. Objectives	c. Activities
<p><u>1974-75</u></p> <ol style="list-style-type: none"> 1. Absence of a preschool program, prohibiting early childhood development for the handicapped. 2. Lack of sufficient certified teachers prohibiting optimal programming for handicapped students. 3. Inadequate transportation services for physically handicapped students. 4. Absence of a vocational program for secondary-age students. 5. Need for additional elementary classrooms for physically handicapped students. <p>(cont.)</p>	<ol style="list-style-type: none"> 1. To plan a preschool program to stimulate growth and development of 3- and 4-year-olds. 2. To provide teacher training through cooperation with the Office of Staff Development and Training and with a university to provide optimal programming for physically handicapped students. 3. To reduce travel time for physically handicapped students as well as provide better programming facilities. Develop a center for physically handicapped in administrative Area III. 4. To provide a vocational program for older physically handicapped students. 5. To plan for additional elementary instructional space for physically handicapped students. <p>(cont.)</p>	<ol style="list-style-type: none"> 1. Develop plans for a preschool program at Bush Hill Annex and Floris Elementary for preschool-age children. 2. Implement a teacher training program with a university competency-based teacher education program. 3. Establish and design a center for physically handicapped students at Floris Elementary. 4. Implement a vocational/occupational program for older physically handicapped students within the secondary schools, using community workshop resources and the Virginia State Department of Rehabilitation. 5. Submit to the Support Services Division plans and requirements necessary for the establishment of a center for physically handicapped students as an adjunct to an already existing elementary school. <p>(cont.)</p>

a. Problem Areas	b. Objectives	c. Activities
<p><u>1974-75</u> (cont.)</p> <p>6. Lack of an adaptive physical education program and a developmental motor training program for physically handicapped students.</p>	<p>6. To provide an adaptive physical education program and motor development training.</p>	<p>6. Employ an adaptive physical education teacher to implement a specialized adaptive physical education program to meet the motor development needs of physically handicapped students.</p>

a. Problem Areas	b. Objectives	c. Activities
<p><u>1975-76</u></p> <ol style="list-style-type: none"> 1. Lack of physical facilities to provide adequate mainstreaming for physically handicapped students. 2. Lack of facilities at the secondary level for the physically handicapped student. 3. Lack of a preschool program for 3- and 4-year-olds. 4. Lack of counseling services for students and parents of the physically handicapped. 	<ol style="list-style-type: none"> 1. To reduce travel time for physically handicapped students as well as provide better programming facilities for physically handicapped in Area III. 2. To extend the continuum of services for physically handicapped students in the secondary schools. 3. To provide a preschool program infant stimulation and early childhood development. 4. To develop a continuum of counseling services that are available to students and their parents throughout the school life of the physically handicapped student. 	<ol style="list-style-type: none"> 1. Open Floris Elementary Center in Area III to provide instructional space for physically handicapped students. 2. Implement a secondary school program for physically handicapped students. 3. Begin preschool classes for 3- and 4-year-old physically handicapped students at Floris and Bush Hill Annex. 4. Employ a family counselor to coordinate the educational, therapeutic and vocational aspects of the physically handicapped student, working at school and in the home.

c. Activities

1. Implement a preschool program for physically handicapped 2-year-olds in the elementary schools.
2. Implement a secondary program for physically handicapped students in order to accomplish peer-group association and provide a continuum of academic services.
3. Implement an educational diagnostic service for comprehensive assessment of physically handicapped students by employing an educational diagnostic teacher.

b. Objectives

1. To provide a preschool program of infant stimulation to physically handicapped 2-year-olds.
2. To provide additional secondary programs for physically handicapped students.
3. To provide a comprehensive ongoing educational diagnostic service for students in the physically handicapped program.

a. Problem Areas

1976-77

1. Lack of preschool program for 2-year-old physically handicapped students.
2. Need to expand the continuum of services to secondary students.
3. Need of diagnostic services for physically handicapped students.

a. Problem Areas	b. Objectives	c. Activities
<p>1977-78</p> <ol style="list-style-type: none">1. Lack of sufficient staff to provide services to identified physically handicapped students.2. Need to review the present instructional program for the physically handicapped student.	<ol style="list-style-type: none">1. To provide an individualized program for all identified physically handicapped students.2. To conduct an evaluation of present student assessment instruments and programing procedures in the areas of self-help skills, fine and gross motor development, social behavior and cognition.	<ol style="list-style-type: none">1. Continue to provide additional personnel to meet anticipated growth in student enrollment.2. Establish a study committee of teachers, supervisors, therapists, medical professionals, and parents to investigate and evaluate the present program for physically handicapped children to determine areas of needed improvement.

FAIRFAX COUNTY PUBLIC SCHOOLS

SPECIAL EDUCATION DIVISION, DEPARTMENT OF INSTRUCTIONAL SERVICES

SPECIAL EDUCATION ADVISORY COMMITTEE

The Advisory Committee for Exceptional Children, a local body, has been appointed by the Fairfax County School Board. The organization of the committee is in compliance with the publication *Administrative Requirements and Guidelines for Special Education Programs* approved by the Board of Education, State Department of Education, Richmond, Virginia, May 26, 1972.

The membership, appointed by the Fairfax County School Board, represents the school division geographically and includes various service and community organizations, PTAs, private schools, parent organizations, and businesses within the county. The coordinator of special education serves on the committee as a representative of the school division. Consultants are called as requested by the committee.

The purpose of the committee is to advise the Fairfax County School Board on matters pertaining to special education.

Duties include:

- Assisting in developing plans for identifying children who need special services
- Cooperating and implementing survey procedures, with both the school and community facilities
- Assisting in the formulation and development of long-range plans that will provide services needed in the school division and the community under the direction of the Superintendent and/or his representatives
- Assisting in the development of priorities and strategies for meeting identified needs
- Submitting reports on the committee's findings and recommendations for action
- Assisting in the dissemination and interpretation to the community of the proposed recommendations of the committee, with plans for implementation.

FAIRFAX COUNTY PUBLIC SCHOOLS

SPECIAL EDUCATION DIVISION, DEPARTMENT OF INSTRUCTIONAL SERVICES

MATERIALS

Highly specialized instructional materials and equipment are often required for some special education programs, while others require essentially the same materials as those used in regular classrooms. It is necessary, however, that a large variety of materials be available to special education teachers to facilitate instruction of the handicapped child since no single instructional method or technique can be expected to reach every student. Special class and resource programs are budgeted on the basis of a formula devised for each handicapped student, in relation to allocations for each student in a regular class. The school budget which accounts for stipulated allocations for each student, includes allocations for each handicapped student. In addition to these monies the special education budget provides for highly specialized materials and equipment as justified in terms of demonstrated need.

FAIRFAX COUNTY PUBLIC SCHOOLS

SPECIAL EDUCATION DIVISION, DEPARTMENT OF INSTRUCTIONAL SERVICES

TRANSPORTATION

In the Fairfax County Public Schools, special transportation is provided for students assigned to special classes or to special programs outside their base school areas. At present, Fairfax County Public Schools is providing door-to-door service for physically handicapped, hearing-impaired, moderately retarded, and multiple-handicapped students attending the Daytime Development Center. In providing the door-to-door services, for some runs, the purchase of hydraulic lift buses, and installation of special seats and seat belts has been required. A fleet of 31 buses is presently providing this service.

Much work in the planning and implementing of an effective system must be done by Fairfax County Public Schools in order to better serve handicapped students. The following list of suggestions should be considered as objectives in planning for adequate service.

- Establish a maximum bus ride for any child not to exceed 45 minutes
- Arrange transportation so that students in special programs will be on the same schedule as regular class-based programs in the school providing housing for the special program
- Provide all preschool mentally retarded, multiple-handicapped, and emotionally disturbed children with door-to-door transportation on buses staffed with an aide and equipped with seat belts
- Parents transport preschool children who do not attend school for at least four hours. Fairfax County Public Schools shall reimburse parents in such cases at current mileage rates
- Provide elementary students assigned to a special class program outside their base school area with door-to-door transportation
- Assign buses to the special education centers for additional field trips as well as for work-related activities.

FAIRFAX COUNTY PUBLIC SCHOOLS

SPECIAL EDUCATION DIVISION, DEPARTMENT OF INSTRUCTIONAL SERVICES

COOPERATIVE AGREEMENT

Fairfax County Public Schools has established a working relationship with the following schools and agencies to provide services for handicapped students for whom no services are provided at present, or whose handicapping conditions are of such low incidence that regional programs seem more feasible.

Other School Systems

Fairfax County Public Schools provides funds for the educational support of students placed in residential facilities and whose education programs are provided by the county system in which the residential facilities are located (e.g., Howard County and Baltimore City, Maryland).

Reston Pre-School for Children with Developmental Difficulties

Is provided a teacher to evaluate the program as well as to establish a preschool model for Fairfax County Public Schools.

Arlington County Public Schools

Cooperates with Fairfax County Public Schools to provide a program for deaf-blind students.

Fairfax County Public Health Department

Provides Fairfax County Public Schools with physical therapy and medical consultation services for physically handicapped students; medical diagnosis, audiological and speech evaluation; and screening and clinical services in schools.

Fairfax-Falls Church Mental Health Center

Is provided with teachers and aides to staff an educational program for emotionally disturbed preschool, preadolescent, and adolescent students.

(cont.)

FAIRFAX COUNTY PUBLIC SCHOOLS

SPECIAL EDUCATION DIVISION, DEPARTMENT OF INSTRUCTIONAL SERVICES

COOPERATIVE AGREEMENT (cont.)

Department of Vocational Rehabilitation

In cooperation with Fairfax County Public Schools, provides services to the high school work-study program for the mildly retarded.

Virginia Commission for Visually Handicapped

Virginia Commission for the Visually Handicapped funds the Fairfax County Public Schools vision consultants on a 50/50 basis. Provides visually impaired students with braille and large-print books, tape recorders, and other educational materials via management of funds from the state and American Printing House for the Blind.

Northern Virginia Training Center

Fairfax County Public Schools provides transportation for certain Fairfax County students, residents of the center, to educational programs within the county.

Daytime Development Center

The transportation for the program at this center is provided in cooperation with Fairfax County Public Schools.

Private Schools for Handicapped Students

Fairfax County Public Schools provides an opportunity for students to be phased into public school programs as they are able.

Cooperative School for Handicapped Children

A transition committee has been formed between Fairfax County Public Schools and the Cooperative School for Handicapped Children, Daytime Development Center, regional special education departments and regional mental health services to help plan the smooth transition of the non-public multi-handicapped program to a public school program. Fairfax County Public Schools is presently leasing Lincolnton School building to the Cooperative School for Handicapped

COOPERATIVE AGREEMENT (cont.)

Cooperative School for Handicapped Children (cont.)

Children for the 1973-1974 school year. In addition, two members from the Cooperative School for Handicapped Children have been asked to be members of the facilities study committee for the moderately retarded.

It is anticipated that establishing working relationships with private schools as well as with other public school systems will continue as needs are identified, particularly in low-incidence programs, in order to broaden Fairfax County Public Schools' capacity and capability in serving children with very unusual or severe handicaps.

FAIRFAX COUNTY PUBLIC SCHOOLS

SPECIAL EDUCATION DIVISION, DEPARTMENT OF INSTRUCTIONAL SERVICES

EVALUATION

Evaluation plans include annual updates of Five-Year Plan implementation and compliance with state guidelines. New programs and expansion of existing programs, physical facilities, transportation services, instructional materials, analyses of pupil/staff ratios, teacher certification status and inservice training activities will constitute a second part of evaluation procedures. The extent to which programs are meeting needs will be evaluated by means of the triennial county census, follow-up of low-scoring children in the state testing program, and ultimate development of a countywide screening program for systematically identifying handicapped children. Student program quality will be evaluated by assessing student entrance behaviors and skill levels, and by periodically assessing student progress in terms of developmental levels and the nature and degree of handicapping conditions.
